

- Anti Loitering Digital Analytics
- CCTV with live operators 24/7
- Prevents crime

## A Safer Building is a Safer Investment. It's like having a Security Guard for \$.75/hour.

Remote building security and CCTV surveillance 24/7 for about \$.75 per hour plus... optional safe package delivery

### 95% of building crime begins at the front door.

The Video Doorman Safe Building System provides your building with remote security and surveillance 24/7, just like an actual doorman or guard. It limits access to tenants; it makes sure the front door is closed; and it prohibits loitering in, and around, the building. Access control, monitoring, and recording, are all rolled into one system. It's the only proactive security system available.

### HOW IT WORKS

The system integrates cameras, with speaker/microphone in the lobby and elevator. It is linked to a high quality Digital Video Recorder equipped with Video Analytics connected to a high-speed IT line and 24-hour UL certified Central Station operators that proactively prevent loitering in the lobby.

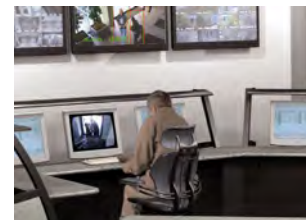

### WHAT YOU GET

- 24/7 Access Control & CCTV Surveillance
- A safe building and entrance area
- Loitering/Soliciting Prevention
- Video Analytics alert Central Station operators to loitering
- 24/7 Emergency Call Buttons in the lobby

1

### CENTRAL STATION

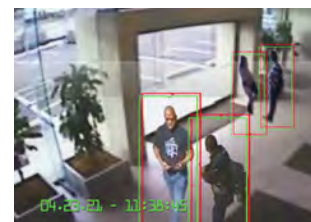

An internet A/V signal travels over a high-speed internet connection to a 24-hour UL certified Central Station. Operators are trained to handle video monitoring calls and will dispatch authorities and notify owners when necessary.

2

### ENTRY/SURVEILLANCE WITH PROACTIVE ANTI LOITERING ANALYTICS

Cameras with proprietary video analytics monitor lobby, entrance, and other areas, to alert trained Central Station operators to warn intruders and prevent loitering. The cameras, speakers, and microphone allow operators to interact, prevent loitering, and notify police, if necessary. Hard working tenants come home to a crime-free entrance.

3

### EMERGENCY CALL BUTTONS

Emergency Call Buttons in the lobby for added tenant security and assistance. When pressed, our operator comes online, and can see, hear, and communicate.

4

### ACCESS CONTROL

The system can include exterior Video Doorman card reader tied into the front door. Tenants use a fob to enter the building. If a fob is lost, it is programmed out.

5

### OPTIONAL DOOR AJAR PREVENTION

If a door is left ajar, anyone can enter. Tenants conducting illegal activities always leave the door ajar so their clients don't wait outside. Operators are notified electronically when a door is ajar and immediately notify building management to correct the problem.

# Video Doorman Safe Building Services

## 1. 24/7 CCTV RECORDING

With a capability for Central Station interface, audio and visual.

## 2. ANTI LOITERING

Video Analytics monitors lobby, entrance, and other cameras. If a person(s) is loitering more than 4 minutes, our Central Station Operators are alerted and come online to ask them to leave: "No loitering allowed in the building." If they don't leave, they will be informed that the Police Department will be dispatched. If they stay, we dispatch. Anti Loitering removes potential muggers, drug dealers, or homeless people from the lobby. Tenants feel safe knowing they are coming home to an entrance with no potential threats. **For owners, this greatly reduces potential liability.**

## 3. DOOR AJAR NOTIFICATION OPTION

We've found criminals often leave the front door ajar, to conduct their illegal activities, so their customers don't have to wait to be buzzed in. If the door is left open more than 5 minutes, we notify building management and can email a clip of the person who left it open.

## 4. CARD ACCESS DOOR CONTROL & MANAGEMENT

Enrollment. No more keys outstanding or lost. Every tenant registers for a fob and if it's lost, it will be programmed out of the system.

## 5. VITAL SIGNS MONITORING

The DVR is programmed to report to Central Station when it needs service, if a camera is out, or if it's turned off.

## 6. 24/7 EMERGENCY PANIC BUTTONS

Emergency Panic Buttons in the lobby for added tenant security and assistance. When pressed, our Central Station operator comes online, and can see, hear, and communicate to assist tenants.
